Materials

Name	Company	Catalog Number	Comments
Laptop 1			Use for presenting exposure soundtrack; preferably using iTunes Visualizer
Laptop 2			Use for programming and presenting categorization task
Laptop 3 (optional)			Use for coding infant looking behavior (can also use one of the above laptops)
Coding software	SuperCoder		Use for coding infant looking behavior
Video recorder			Use for recording infants' face (looking behavior during categorization task)
Mixer			Use for integrating information from the video recorder (infant looking behavior) and the visual stimuli (categorization task)
DVD player			Use for recording the input from the video recorder (infant looking behavior)
Television			Use for viewing input from mixer (screen-in-screen; categorization task in corner of screen showing infant looking behavior)
Projector			Use for projecting visual stimuli of categorization task on screen
Speakers			Use for presenting auditory stimuli during categorization task
Blacked-out sunglasses			Use for blocking caretaker's vision during categorization task
Statistical analysis software	R		Use for analyzing infant looking behavior
