Materials

For monitoring during surgery

1. A heating pad to maintain normal temperature.
2. A transcutaneous oxygen monitor.
3. A temperature monitor.

For surgery

1. A #3 knife with #15 blade.
2. Two pairs of forceps (one for skin and another for other soft tissues).
3. 2-3 pairs of small clamps.
4. One or two pairs of micro scissors (for tissue cutting).
5. One pair of small scissors (for cutting sutures).
6. A needle holder.
7. A few stainless steel punches (for making wounds).
